CUSTOM PLAY ENVIRONMENTS

A large, moss-covered tree trunk lies horizontally across the middle of the frame, extending from the left towards the right. The forest is dense with green foliage, including ferns and various trees. The lighting is soft and natural, suggesting a shaded forest environment.

If a tree falls in the forest...

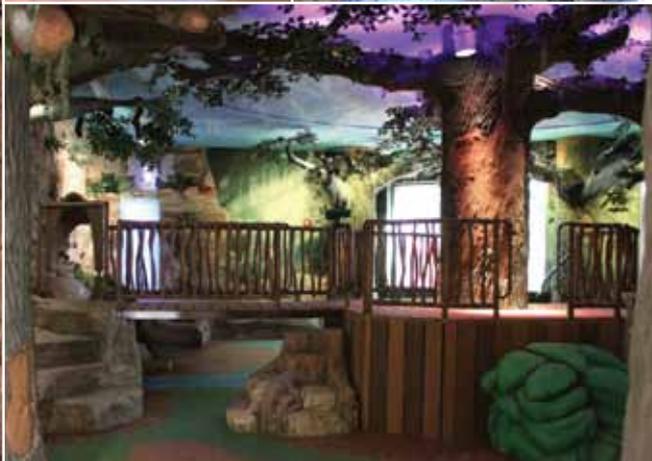

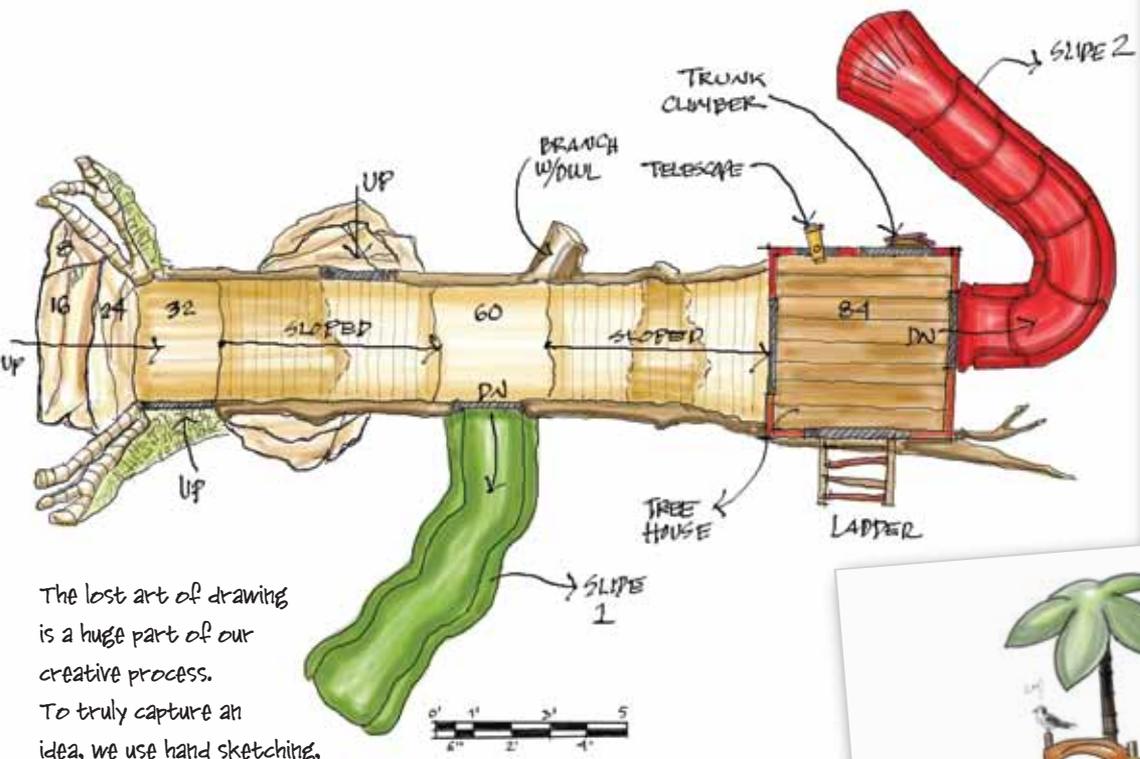

We think so. In fact, almost anything can inspire us— a magical forest, a sunken ship, a busy city...anything.

...can it inspire an awesome play structure?

At CresPlay, we design and build realistic worlds that capture the imagination and delight the senses. Our mission is to create the most amazing play environments the world has ever seen. So step inside and let your inner child run wild. And don't forget the bug spray!

The lost art of drawing is a huge part of our creative process. To truly capture an idea, we use hand sketching, digital rendering, 3D modeling, and artistic prototypes.

Some folks call us artists.
We're okay with that.

From initial concept drawings
to the fabrication of life-like
play structures, everything we do
shows in the final product. Every detail
is given the attention it needs to
dazzle kids and adults alike.
We will settle for nothing less.

Where would you like to go?

The Great Pyramids of Egypt? The Amazon Rainforest? An intergalactic space station? It just doesn't matter. CresPlay can take you anywhere your imagination can conjure up. Using concrete, steel, glass fiber reinforced concrete (GFRC), composite wood, sculpting epoxy, and various plastics, we can achieve realism and durability that will amaze and delight for decades to come.

Raising the bar on Playgrounds

A playground can be a magical place. When you mix materials, textures, and styles, it creates a world that seems real and authentic. Our goal is to replicate nature, down to the most minute detail.

Kids notice. Adults notice.

And communities notice.

It's this attention to detail that makes our work rise above what's being done elsewhere in the industry.

Let's Face it...

Most playgrounds are boring. You've seen them a hundred times. But with CresPlay, you're getting something completely custom and entirely unique - so much more than the traditional post and platform play structure. So you can either look like everyone else, or have a look all your own.

It's OK to be Different

Who said you have to be like everybody else?
Your community is distinctive – your play environment should be too. Don't settle for the standard solution. Your project deserves a play environment that sets you apart and draws people from other communities to visit and interact with something original.

It's more than a playground.

It's an alternate universe.

“OMG! This is the most wicked playground I’ve ever seen.”

— Nichol C., Age 11

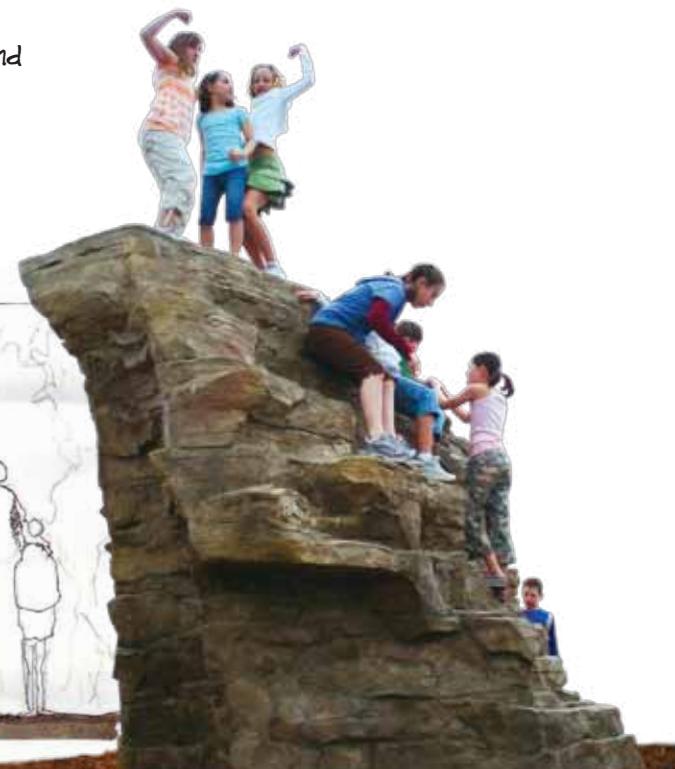

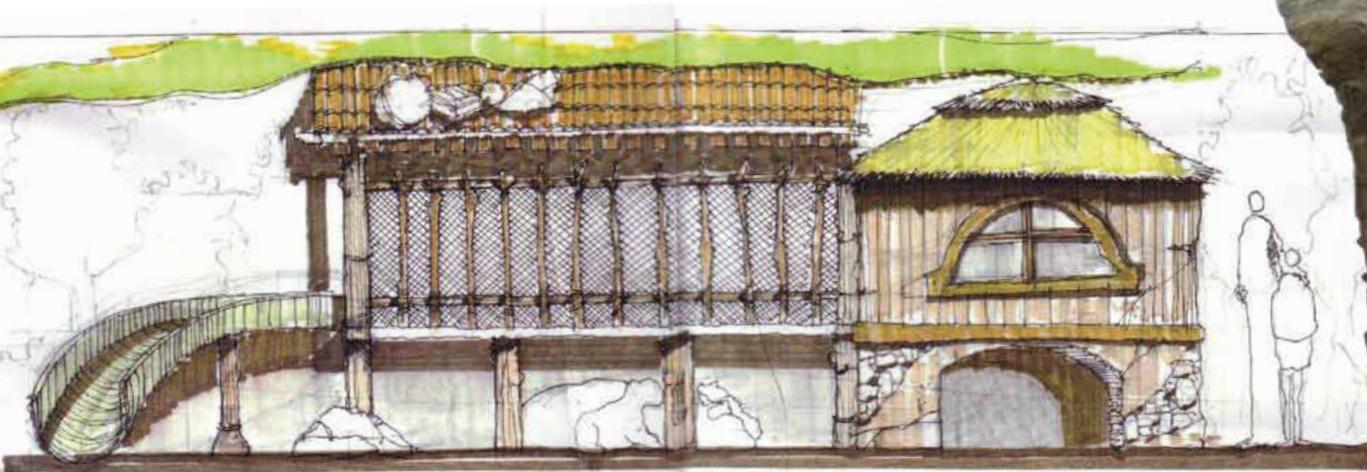

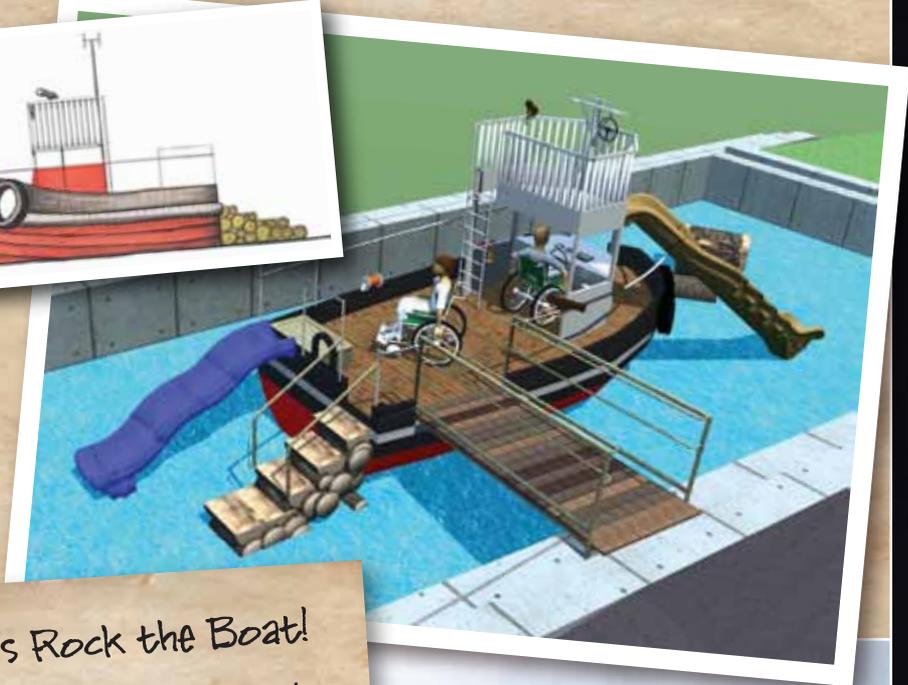

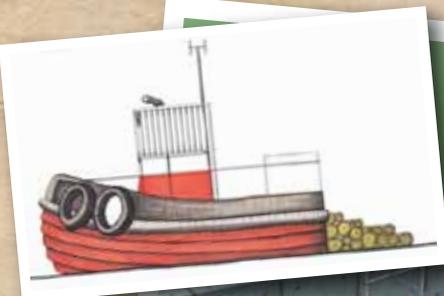

You can discover
more about a person
in an hour of play
than in a year of
conversation.

- Plato
Greek philosopher
427-347 BC

Studies show that play may, in fact, be the highest expression of our humanity, both imitating and advancing the evolutionary process. Play allows our brains to exercise their very flexibility, to maintain and even perhaps renew the neural connections that embody our human potential to adapt, to meet any possible set of environmental conditions. Isn't it worth investing in?

Let's Rock the Boat!

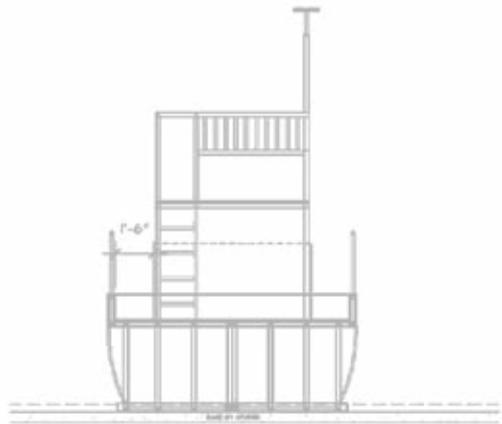

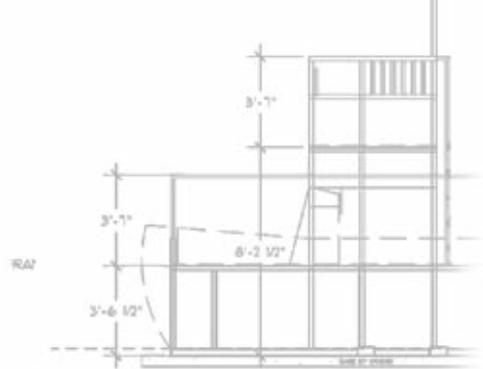

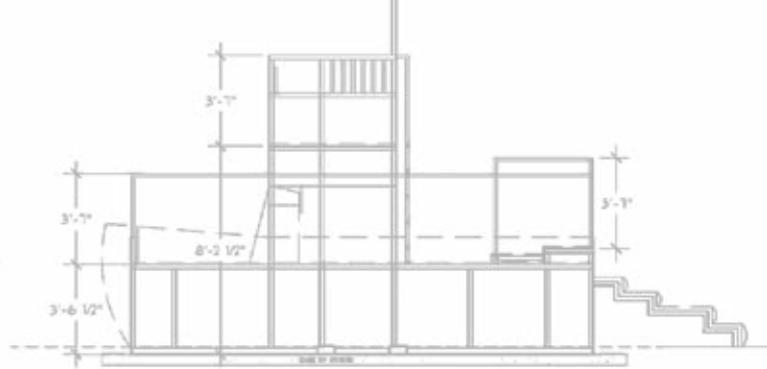

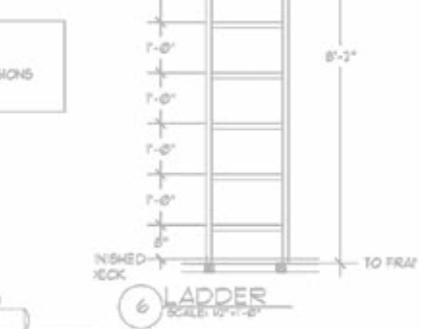

It's time to go against the grain, shatter the status quo, and march to the beat of your own drum. Life is too short to work on a boring project. Let's spice things up! Let's explore new ideas and try things that have never been done before. Let's go on an adventure. Let's CresPlay!

Who is this Guy?

Hi! I'm Todd Lehman. I'm the "design guy" behind this whole operation. There is nothing I enjoy more than creating fantastical worlds that blow people's minds. I have spent my entire career building a company that embraces creativity and breaks the mold of traditional playground manufacturers. When you work with our team of skilled artists, I personally guarantee an experience that is enjoyable, creative, and fun. Your project will be amazing. I'll have it no other way. I look forward to working with you.
